Profile

Visual designer and digital app creator based in Kuwait, currently pursuing a degree in Cybersecurity at Arab Open University. I build Windows, iOS, and game experiences using Python, C#, Swift, and GDScript, pairing technical development with a strong visual-design foundation in Adobe Creative Cloud. I'm interested in creating thoughtful digital products that are functional, polished, and secure.

Experience

Parts Operations Coordinator, *Alghanim Industries* 02/2026 – Present
Shuwaikh, Kuwait

- Maintain and update inventory data within Kerridge ERP with high accuracy.
- Manage organized digital records across Excel and Outlook at scale.
- Coordinate data and order processing workflows supporting sales and technical teams.

Education

BSc Information Technology & Computing, *Arab Open University* 02/2026 – Present
Al-Ardiya, Kuwait

Godot	Adobe Photoshop
Adobe Illustrator	Figma / UI Design
Word	Excel
PowerPoint	Adobe After Effects

Languages

• English	• Arabic	• Sinhala
• Hindi	• Bangla	

Projects

Ofunc.dev — Personal Portfolio, *HTML · CSS · JAVASCRIPT · OFUNC.COM*

Present

- Designed and developed a personal portfolio website showcasing projects, writing, and work.
- Built entirely from scratch with no frameworks — semantic HTML, custom CSS, vanilla JS.

Memento — iOS Task Manager, *SWIFT · SWIFTUI*

Present

- Built a native iOS task management app with a focus on minimal UI and smooth interactions.
- Architected data persistence, state management, and custom UI components in SwiftUI.

Tempora — Pomodoro Timer, *C# · WINUI 3 · WINDOWS APP SDK*

2025

- Developed a Windows desktop Pomodoro productivity app with session tracking and notifications.
- Implemented custom WinUI 3 controls and a fluent design system for a native Windows feel.

Barcamp Forms, *REACT · FIREBASE*

2024

- Built a form and registration management system for Barcamp Kuwait using React and Firebase.
- Handled real-time data sync, form validation, and responsive layout end-to-end.
